BLM,

Please make this letter part of  
the record on the W. Oregon Plan Revision  
of the NWFP.

The BLM manages the public lands for all the public in the USA. All remaining old growth should have permanent protection from logging or other adverse uses, like ORV's. Little of our nation's forests remain in their natural virgin state and everything possible should be done to keep them pristine. No logging roads, ORV's or any cutting should take place in any BLM lands in The Pacific Northwest old growth remaining.

Sincerely
